

## Timothy Burns

Born and raised in Arizona, Chef Timothy Burns, an AZ Culinary School graduate, has watched the medical marijuana industry grow more rapidly than the availability of quality education. As a seven-year medical marijuana patient, he has experienced many pre-packaged products that are available through state-licensed dispensaries. Through eight years culinary experience, Tim has proficiency in incorporating medical marijuana into products without diminishing the quality of the medicine. That talent won him an industry award.

For the past five years, Tim has been applying his culinary knowledge to the cannabis industry by working with various State-Licensed dispensary cultivations, extracting cannabis and infusing scratch-made medical marijuana products. He has also been managing a Medical Marijuana evaluation center, delivering quality medical marijuana education to new patients.

# Make Sensi Concierge

Concierge Services for  
Medical Marijuana Patients

# Concierge Services

Make Sensi Concierge services begin with a consultation between patient and concierge. A comprehensive consultation with the patient touches on topics including the following: Condition to be treated, allergies, preferred method of medicating, frequency of medication, budgetary needs, and prior knowledge, use, and/or experience. Following your consultation, your Concierge will accompany you to a local state-licensed dispensary. While at the dispensary, he will show and explain all the different products, help you understand and read labels, descriptions, dosages, and answer any other questions you may have. Finishing up, a written personal plan will help guide your decision making in the future.

## Service Packages

### Package 1: Novice

This package is ideal for a novice medical marijuana patient that needs more information on various methods of treating their condition, while getting the most benefit out of the natural method of treatment.

This package includes:

- Budgeting, use, storage, infusion, and extraction education.
- Understanding of basic plant profiles specific to treating patient's medical condition.
- General use education and instruction for various methods of medicating, dosage, etc.

### Package 2: Amateur

This package is designed for the intermediate medical marijuana patient who has experienced some different methods of treating their condition and wishes to explore infusion and extraction medications more deeply, and gain more knowledge about them.

This package includes:

- Education on the multiple processes of infusing, as well as extraction.
- A demonstration and/or lesson making butter or oil for infusing process.
- Working with patient to find a proper dosage of homemade goods.

### Package 3: Pro

This package is for advanced medical marijuana patient who is familiar with the medicine and would like to be hands on in processing the raw flower into personalized medicated products.

This package includes:

- Individual lessons on infusing medical marijuana.
- Individual lessons on ways to extract the medicine into a concentrate for use in infusions, topical ointments or lotions, and smoking.
- Provide recipes for home infusions

\*Following your consultation, a la carte packages can be created based on your needs.
